The grooved aluminium end style of the 4200 incorporates the handle, for a fresh, clean look that works with most room décor. Also available is a reversible heavy duty handle style, with a flat or grooved finish designed especially for larger doors.

Available in a wide range of finishes and colours, the 4200 can be configured to use up to four door panels, offering maximum flexibility. Melteca®, Seratone® or frosted/painted glass infill can be combined with mid rails to produce modern, attractive door panels.

Traditional infills such as painted Gib® Board or a safety mirror can be used to match or highlight interior décor.
