HINGED & SLIDING INSECT SCREEN OPTIONS

Pet Resistant

Made of vinyl-coated polyester this fabric is much heavier than traditional fiberglass or aluminium screening. Resistant to tears and damage caused by pets.

Pet Resistant Mesh

Mohair

As an option all around the inside of your insect screen window or door. Protects joinery and prevents insects from getting in between little gaps.

Mohair

Removable Hinges

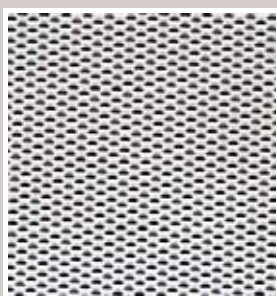

Removable hinges mean that you can remove your insect screen in winter and store away until you need it again in summer.

Removable Hinge

Look-out One Way Vision Mesh

With the correct lighting allows a person on the inside to see out and not be seen from the visitors side. Look-out is made from highly durable aluminium and therefore is an ideal and cost effective flyscreen for your family.

Look-Out Mesh

Available from:

JBR/VKINSECT/07

RETRACTABLE INSECT SCREEN FEATURES

Viscondynamic Brake

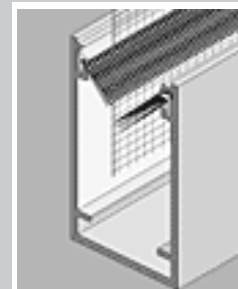

This brake system controls the recoil speed of retractable insect screens preventing the screen from slamming open if accidentally released. The brake is concealed inside the systems housing so the appearance is no different than a screen without a brake.

Viscondynamic Brake

Anti-wind Brush Pile

Specifically where windy conditions exist. The anti-wind pile keeps the screen in its place and utilises different length of brush for each side, leaving a small central gap for the screen to pass freely without friction.

Anti-wind Brush Pile

Stainless Steel Spring

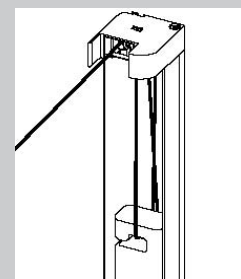

Withstands even the most extreme weather conditions.

Stainless Steel Spring

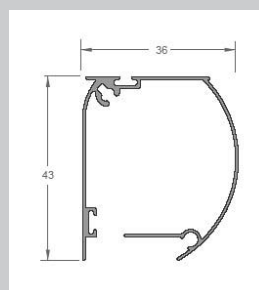

Smooth Upgrade

Smooth Upgrade allows a Retractable Screen Door to close gently at multi-positions offering controlled recoil for concerned users, especially with small children.

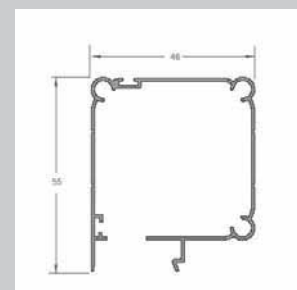

Smooth Upgrade

Choice of Two Series

Series 36 for smaller openings

Series 46 for larger openings
