

RESIDENTIAL ROLLER SHUTTERS

EXTRA SECURITY FOR YOUR HOME

InterceptTM

Intercept™ Roller Shutters

Residential Protection, ready to install

5 year warranty

Intercept Roller Shutters are constructed from heavy-duty aluminium profiles which roll down to protect your home while you are away and then roll out of sight when not in use.

Minimum width:
600mm
Maximum width:
3 500mm
Standard profile width:
40mm

Electric operation standard.

Available in reveal (within the window cavity) or face-fixed options.

Intercept Roller Shutters are designed to be fitted during the construction of your house utilising the wall cavity, or can fitted to an existing home.

A choice of colour

Intercept Roller Shutters can be powder-coated with a choice of colours to match any decor.

Robust Construction

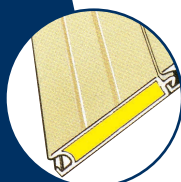

Strong interlocking profiles and deep side channels resist forced entry by intruders.

Intercept Roller Shutters non-corrosive characteristic means that they are low maintenance. Once installed over your windows they protect your home in all kinds of ways, with the pocket of air trapped between the shutter and the window acting as insulation, replacing the need for heavy drapes or double glazing. Each Intercept Roller Shutter comes with a 1-year warranty on the motor and a 5-year warranty on the shutter.

Easy to Operate

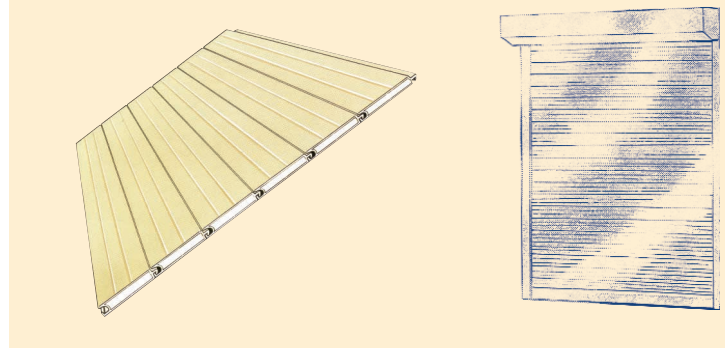

The standard Intercept Roller Shutter is controlled with an internal tubular electric motor via an electric switch inside your home. Remote control also available.

Total Privacy

A special foam filled profile is available, providing extra insulation and reducing noise levels by up to 50% (Colour: Titania White Only)
