- Enjoy clear unobstructed views
- Maximum strength and durability
- High tensile 316 marine grade stainless steel
- Modern innovation
- Unique patented pressure assembly process
- Corrosion resistant
- 10 year warranty
- Available in a range of frame colours
- Standard hardware included
- Optional 3-point locking mechanism
- Hinged / Sliding / French / Stacker Door Systems
- Hinged / Sliding window systems

Screen Style - Woven Mesh

316 Marine Grade
Stainless Steel

BE SECURE AND STILL ENJOY THE VIEW

SupaScreen® security door and window screens are an innovative design that allows for unobstructed views, whilst maximising strength and security. Produced from high-tensile stainless steel that is woven into a fine mesh, SupaScreen® combines exceptional security with an aesthetically pleasing appearance.

The screens are assembled using a unique patented pressure assembly process which eliminates any need for screws or rivets. This also means no dissimilar metal meets the mesh, removing possible points of corrosion. Rigorously tested for resistance to forced entry, the strength of the 316 Stainless Steel mesh and frame enables SupaScreen® to meet and exceed the Australian Standard AS5039-2008 for Security, Cyclonic Missile Impact and Knife Shear Tests.

The ability to powder coat the frame to match the colour of existing joinery, the strength and security of SupaScreen® and its unrestricted view through the fine mesh screen make SupaScreen® perfect as a front entrance that will not detract from the appearance of the home.

PRODUCT FEATURES AND BENEFITS

- Security door tested to Australian Standards AS5039-2008 and A55041 (clause 7.2) Dynamic Impact Test
- See through screen doesn't block view

- Unique patented pressure assembly process
- Reduces heat and glare
- 7 year warranty
- Available in a range of frame colours
- Standard hardware included
- Optional 3-point locking mechanism
- Hinged / Sliding / French / Stacker Door Systems
- Hinged / Sliding window systems

Screen Style - Perforated Sheet

1.6mm hardened aluminium sheet

Note: Some vertical 'read' lines will be visible when viewing up close

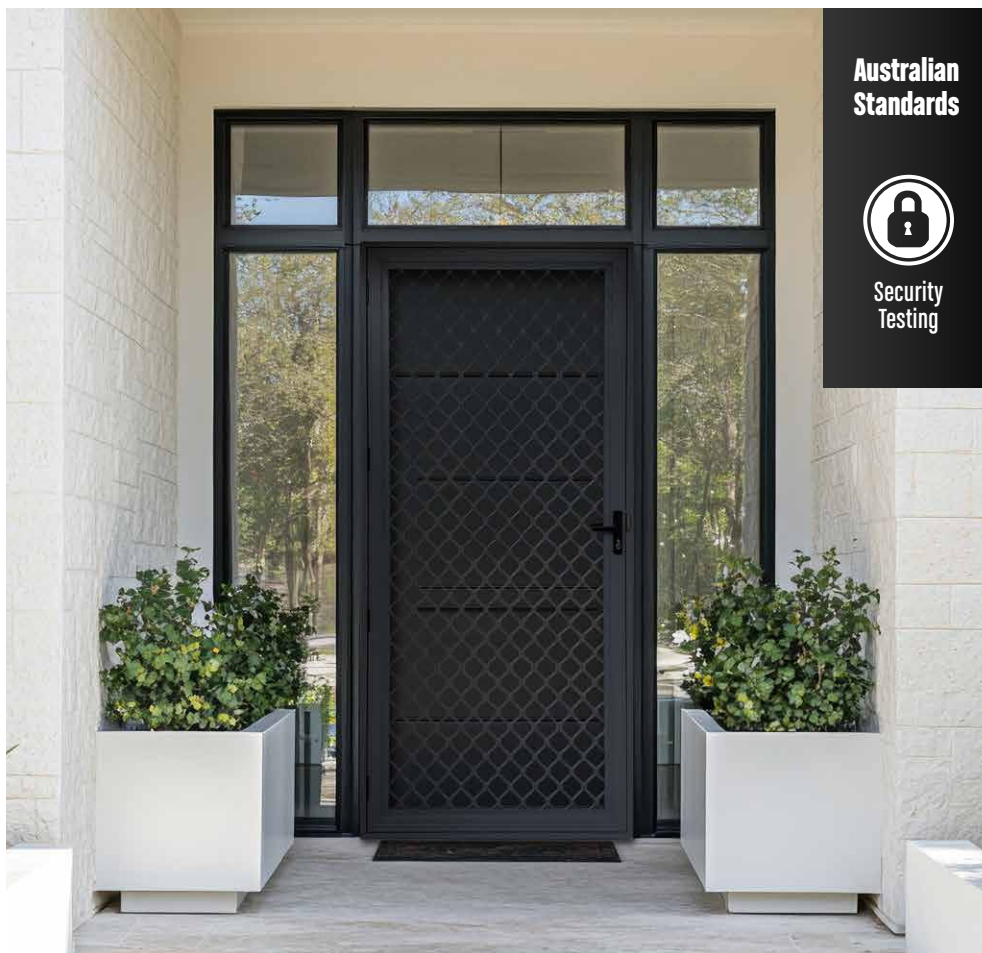

LETS THE FRESH AIR IN, BUT THAT'S ALL

Clearguard® represents the latest innovation in home security screens in NZ and is a modern alternative to Amplimesh® grilles and the premium woven stainless steel Supascreen® mesh. The screens are assembled using a unique patented pressure assembly process, which removes any requirement for screws or rivets.

The use of a hardened 1.6 mm thick aluminium sheet that is less intrusive than the traditional aluminium diamond grilles, and its innovative design created with punched holes make a Clearguard® screen virtually translucent. This provides quality security without blocking your view and is particularly useful during warm weather when you likely want to leave doors and windows open to promote airflow. Its strong aluminium frames are able to be powder coated to the colour of choice or to match existing joinery. Proven strength and security as Clearguard® has been tested to meet and exceed Australian Standard AS5-039-2008 for Security and Knife Shear Tests.

PRODUCT FEATURES AND BENEFITS

- Security door tested to Australian Standards AS5039-2008
- Visual deterrent
- Tried and tested, over 50 years in the market
- Choice of grilles available powder coated in colour of choice

VISUALLY DETERRING UNWANTED GUESTS

Amplimesh® grille window and door screens offer peace of mind against uninvited visitors, representing a visual deterrent to unwelcome guests and are a high-quality physical barrier against anyone attempting to break in. With insect mesh as a standard feature on all Amplimesh® screens, homeowners can also enjoy open doors or windows to enable airflow and fresh air to enter without unwanted visitors, mosquitoes, or flies getting in.

Recognised for its superior quality and longevity, Amplimesh® has been reassuring customers security has been taken care of, for over 50 years in New Zealand. Security screens from the Amplimesh® range are available in a variety of grille styles, and both the grille and frame come in a range of standard colours or can be powder coated from the Dulux® range of colours to match existing joinery or preference.

*106 is generally suitable for commercial windows only

*Requires Yale Connect Plus WiFi bridge. Sold separately

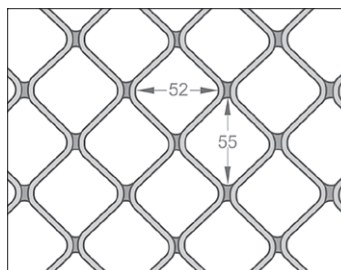

ADDITIONAL FEATURES

GRILLE OPTIONS

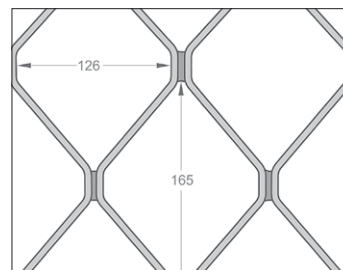

*106 is generally suitable for commercial windows only

1 Grille 103 Standard

2 Grille 125 Compact

3 Grille 106*

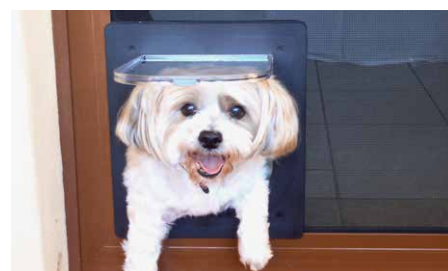

THREE POINT LOCKING SYSTEMS

The door is secured at the top, middle and bottom for extra security. 3-point locking is available across the entire range of hinged and sliding locks.

PET RESISTANT MESH

Pet-resistant screen mesh is made from a fibreglass material specially designed and manufactured to be more durable and resistant to tears or damage caused by most household pets.

PET DOORS

Able to be fitted to Security Doors and made from UV-stabilised plastic, with magnetic closers. Available, in black in 3 size options.

LOOK-OUT™ ONE WAY VISION MESH

With the right lighting, Look-Out™ One Way Vision Mesh allows clear viewing from inside the property while limiting visibility from the outside.

HEAVY DUTY CLOSER

Pneumatic Door Closer for hinged or sliding doors with speed adjustment and hold open facility. Available in White or Black.

Hinged shown

D-PUSH PLATE

Made from clear polycarbonate or aluminium and available in a range of standard or custom powder coat colours. The D Push

Plate prevents mesh tearing when opening or closing the security door and also provides added protection for the snib lock.

CARETAKER™ FUNCTION

The Austral Ultimate's patented Caretaker one-way locking function allows a door to be snib locked from the outside (but not unlocked) by a Caretaker key. This enables occupants to unlock the door by simply operating the inside snib lever (without a key). The door can then be opened by pushing down on the unlatching lever.

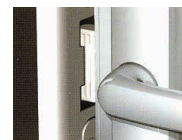

DUALSELECT®

Incorporating Lockwood's advanced safety and security feature, DualSelect® is a 2-stage key locking system that offers the choice of selecting safety or secure mode when exiting the home. Safety Lock provides security from the outside while allowing occupants inside, to exit with a snib lever. Secure Lock requires the key to unlock the door from inside and outside.

JEMMY RESISTANT STRIKE PLATE

A Jemmy-resistant door strike plate is designed to slightly, deform under an attempt to use a crowbar (or Jemmy) to force an entry. This leaves the door locked and secured. Comes as standard with the Ultimate and Elegance hinged door lock.
